

CI **Ever Pak**® Multi-Pocket Filters MERV 13 & 15

CI **Ever Pak**® Multi-Pocket Filters are engineered with superior performance criteria in all facets of filtration including efficiency, resistance, and dust-holding capacity to address today's challenging HVAC system requirements.

As a part of the most advanced and innovative line of HVAC filtration products, the CI **Ever Pak**® Multi-Pocket Filters combine an excellent initial and lifecycle resistance with a high dust-holding capacity. This combination provides optimum filter performance — creating the energy and operating cost savings desired in the demanding HVAC market. The CI **Ever Pak**® Multi-Pocket Filter is backed by the outstanding customer service and on-time delivery that customers have come to expect from Columbus Industries.

Description and Benefits

The CI **Ever Pak**® Multi-Pocket Filters are one of the best and most economical choices for extended-surface, high-efficiency filtration. Each filter utilizes a technologically advanced media that incorporates a dual-layer, gradient-density fiber structure that results in exceptionally low air flow resistance, at the highest efficiency levels – reducing both energy and operating costs.

These high-performance filters will improve indoor air quality and remove contaminants from HVAC environments. The CI **Ever Pak**® Multi-Pocket Filters are engineered to protect both expensive HVAC equipment and workers from dirty air and its damaging effects. The user-friendly filter is also lightweight, durable and easy to install.

The CI **Ever Pak**® Multi-Pocket Filters are assembled with a rigid, aerodynamic media pocket that is bonded to a metal support channel. The pockets are then inserted and bonded to a non-corrosive metal frame, and mechanically fastened together for added strength and durability. Each stage of the assembly process is quality controlled to ensure the performance, consistency and durability of each filter. These design and construction features combine to produce the best all-around performance in air flow, efficiency and dust-loading uniformity.

Looking for LEED certification? The CI **Ever Pak**® Multi-Pocket Filters are the perfect solution if you want to specify or upgrade your current filtration to meet LEED certification requirements. With these high-performance filters, your facility can gain points toward LEED certification – without incurring large operating cost increases. The CI **Ever Pak**® Multi-Pocket Filter meets efficiency standards outlined in the LEED program for new construction and existing buildings.

Features and Applications

Features:

- Provides a low initial resistance
- Provides low energy consumption
- Provides low operating cost
- Meets requirements for LEED certification
- Provides a rigid self-supporting pocket

Applications:

- Commercial and industrial facilities
- Pharmaceutical
- Government and educational facilities
- Hospitals
- Paint booth/finishing

Technical:

- Available in a variety of sizes, depths and configurations
- Available in MERV 13 and 15
- Self-sealing option available
- Tested in accordance with ASHRAE Test Standard 52.2-2007
- UL Standard 900 tested and approved
- 100% synthetic media
- Temperature rated up to 160°F

CI Ever Pak® Multi-Pocket Filters
